DATE OF IN

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. [ ] source of information that the BUSCHBECK Group went to Tushino [ ]

Several members of the group remaining at Monino met some of the Germans who were moved to Tushino while shopping in Moscow. Any information that I have about the BUSCHBECK Group was obtained by these chance meetings in Moscow. I cannot state exactly who gave me which item of information, since any news brought back from these meetings quickly made the rounds and became common knowledge.

2. [ ] the same source provide information regarding new research and development center for AA rocket techniques at Tushino [ ]

50X1-HUM

As pointed out above, the source was chance meetings with members of the 12 families who moved to Tushino with BUSCHBECK. I was told by one of the Germans now living at Tushino that they are working for an Institute whose director is (or was) the son of Beria. I have no definite information on the activity of the BUSCHBECK Group. I believe that they are working on missile guidance and control, and that a compromise is being made between the system developed by HOCH, and that by the BUSCHBECK Group at Monino. The 2x2 km area is only a residential area, and is surrounded by a fence with barbed wire on top. The houses in this area are about

80 meters apart. [ ] remarks about the airfield complex in Tushino were rather vague, and should not be considered reliable. ]

50X1-HUM

3. [ ] the BUSCHBECK Group, member of German Scientists, [ ]

[ ] The so-called BUSCHBECK Group is the EITZENBERGER Group. BUSCHBECK was the Technical Director, while EITZENBERGER was the Administrative Director over BUSCHBECK.

4.

50X1-HUM

[ ] I know of no research and development center in Tushino.

5.

[ ] The test stands are generally known to be in one of the Tushino airfields. I only know this, however, by hearsay. [ ] has data and experience on which to base an estimate of the limits of development, and performance characteristics of target seeking heads in the Soviet Union. He has been asked to prepare such an estimate. This will be submitted approximately 31 January 1954. ]
